A part of rotovia

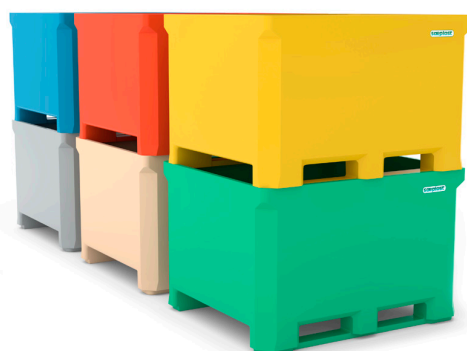

“Closed cell” core design with triple wall bonded polymers will not absorb liquid or harmful contaminants. Allows for consistent tare weights.

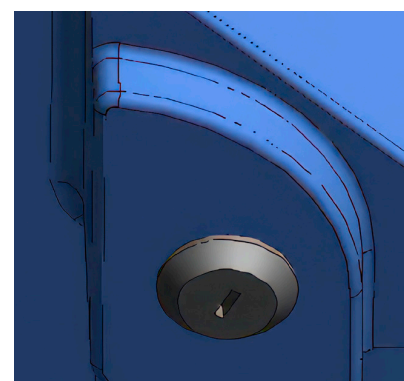

The smooth wall one-piece design lends to ease of cleaning and savings in water, detergent, and sanitizers.

Go higher – PE containers can be stacked safely 4 high thus saving valuable floor space.

Multiple colors are available to assist in any food safety color-coding system.

Replaceable wear pads available on the bottom of the containers prevent wear and allow for ease of movement.

Lightweight and robust for easy handling, reducing strain during movement in the plant
