

# Sæplast Solutions for the Seafood Supply Chain

Optimized Handling.  
Ensuring Freshness and  
Quality from Catch to the Plate.

**At Sæplast, we design containers built for the unique demands of the seafood industry.**

Built to last and engineered for performance, our triple-wall containers protect and preserve—every step of the way.

## Onboard Handling & Transportation

Reach peak fish quality from boat to plant with proper handling using Sæplast containers and ice to preserve freshness.

- Maintains temperature longer for extended cold chain protection.
- Durable triple-wall construction aids in preserving the highest fish quality possible.
- Stackable and lightweight tubs lead to improved employee safety.

## Built for the Processing Plant

Sæplast PE containers offer durable, hygienic protection for seafood within the processing plant.

- Triple-wall PE designs ensures long lifespan and better performance.
- Smooth, rounded surfaces for easy cleaning and sanitation.
- The closed cell core of the container keep seafood safe and contaminant-free.

## Why Choose Sæplast?

At Sæplast, we champion a circular economy with reusable, long-life containers that minimize waste, maximize efficiency, and preserve seafood value.

## Better with Ice

Using slurry ice with our containers ensure even more rapid cooling, preserving fish freshness and enhancing overall yield during processing.

## Circular Economy

Our container's lifecycle promotes sustainability by creating durable, recyclable containers that reduce waste and keep costs down.

## Custom Branded Solutions

### Silk Screen Printing

One-colour screen print of a logo or text molded into the wall of the box. (Ink colours are limited)

### Mold-In Graphics

Molding a full colour logo directly onto the bin allows for your logo to stand out and provide maximum exposure.

### Available Colours
