

Built Tough, Trusted by Processors.

SAEPLAST.COM

Advancing circularity
with hygienic, durable,
and sustainable Saeplast
buggies & containers.

Built to Replace Inferior Packaging

At Saeplast, we're leading the transformation in how the meat and poultry industry handles, stores, and transports product. By replacing traditional packaging materials (like cardboard, steel, and single-wall plastic) with our robust, triple-wall, and reusable containers, we help processors cut waste, reduce daily operating costs, and improve food safety while meeting sustainability goals.

Cardboard is single use and absorbs liquids; steel is heavy, noisy, difficult to repair and cost prohibitive; and single wall plastic will shatter, deform and cannot safely be stacked.

Saeplast PE buggies and PE containers offer a clean, safe and sustainable alternative - engineered for durability, food safety and years of worry free usage.

Sustainable Packaging with Real Savings

Processing plants that have switched to Saeplast PE report up to 80% less packaging waste, realize long term cost savings, have safer work environments with reduced noise and have food safety peace of mind.

Enhanced Hygiene & Food Safety

Built as a one-piece design, Saeplast PE containers reduce foreign material contamination, minimize bacterial risk, and offer smooth walls that simplify cleaning.

Join the Circular Future!

Processing plants worldwide are upgrading with Saeplast PE. Choose Saeplast innovative PE containers that align with sustainability goals, meet regulations, and are food and employee safe.

Lids are available for both containers and buggies.

Pallet Runner vs. LEG

Pallet Runner

Bottom is better suited for safe stacking and conveyor use.

LEG

Container legs are ideal for forklift and pallet jack transport.

Custom Branded Solutions

Silk Screen Printing

One-colour screen print of a logo or text molded into the wall of the box. (Ink colours are limited)

Mold-In Graphics

Molding a full colour logo directly onto the bin allows for your logo to stand out and provide maximum exposure.
