

Built to last

Stable, robust and designed for performance

Transportsilo

TS5106

Meeting the highest industry standards for food and cosmetics logistics

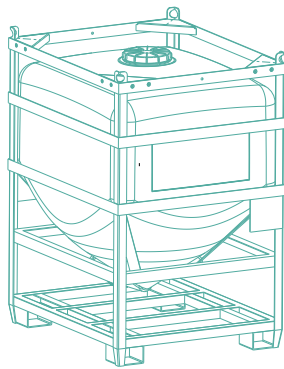

www.saeplast.com

The ideal solution for storage and transport

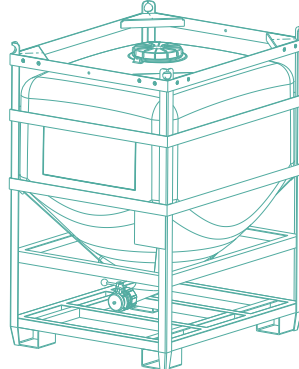

Our robust transport silo is a reliable and durable solution for the storage and transport of liquids and highly viscous materials. Made from high-quality linear low-density polyethylene (LLDPE), the impact-resistant tank is suitable for both the food industry and cosmetic applications. The rotational moulding process ensures a seamless, stress-free and hygienic design without weld seams. The tank is securely housed in a galvanised steel frame, allowing easy handling with a forklift or pallet truck for efficient logistics.

Key benefits:

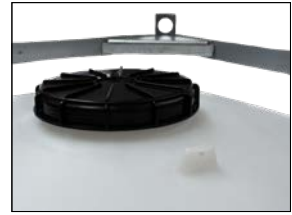

- ✓ Hygienic and easy to clean
- ✓ Extremely durable
- ✓ Stable and robust

Technical Specifications

| Model: Transport silo TS5106 | |
|------------------------------|---|
| Capacity | 1045L (max. up to the threaded neck) |
| Dimensions | 1225 x 1025 x 1600 mm |
| Weight | 180 kg |
| Material | LLDPE (low linear density polyethylene) |
| Outlet Cone | 45° |
| Lid | 400 mm, screwable, sealable |
| Outlet | 2" stainless steel butterfly valve |
| Frame | Galvanised steel frame |

Made from food-safe materials.
