

Built to last

Stable, robust and designed for performance

Transportsilo

TS100-01

Meeting the highest industry standards for food and cosmetics logistics

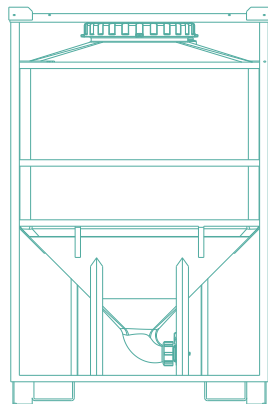

www.saeplast.com

The ideal solution for storage and transport

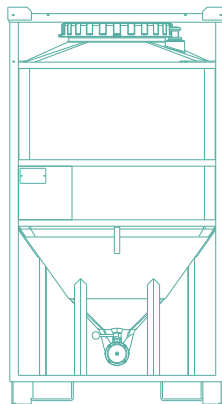

Our robust transport silo is a reliable and durable solution for the storage and transport of highly viscous liquids and materials. The impact-resistant tank is made of high-quality linear low-density polyethylene (LLDPE) and is suitable for the food industry as well as for applications in the pharmaceutical and cosmetics industries. The rotational moulding process ensures a seamless, stress-free and hygienically designed tank without weld seams. The tank is securely housed in a galvanised steel frame, making it easy to handle with a forklift or pallet truck for efficient logistics.

The most important advantages:

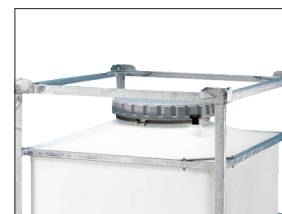

- ✓ Hygienic and easy to clean
- ✓ Extremely durable
- ✓ Stable and robust
- ✓ Optimum emptying
- ✓ Lockable
- ✓ Ventilation

Technical Specifications

| Model: Transportsilo TS100-01 | |
|-------------------------------|---|
| Capacity | 1000L (max. 1200kg) |
| Dimensions | 1018x 1218 x 1850 mm |
| Weight | 220 kg |
| Material | LLDPE (linear low density Polyethyleen) |
| Outlet Cone | 45° |
| Lid | 400 mm, screw lid, sealable |
| Accessories | Labyrinth type vent |
| Outlet | 2" stainless steel butterfly valve |
| Frame | Galvanised steel frame |

Made from food-safe materials.
