The ideal solution for storing and transporting bulk goods

The Hopper 1000 and 1800 are the ideal solution for storing and transporting eggs, ingredients, granulates, tablets and sauces. It is made from a one-piece moulded linear low-density polyethylene (LLDPE), approved for food use, is significantly lighter than conventional metal alternatives and completely corrosion resistant. With a large filling opening at the top (400mm wide) and an outlet at the bottom of up to 300mm, the Hopper ensures fast and efficient filling and dispensing.

The most important advantages:

- ✓ Large storage capacity with a small footprint
- ✓ Designed for use with forklift trucks and pallet trucks
- ✓ Maintenance-free and hygienic
- ✓ Intelligent and functional design
- ✓ Complete product discharge
- ✓ 60° cone prevents bridging
